TREND (PRE-NOVUS → CURRENT STATE)

PRE-NOVUS		CURRENT STATE	
	Fragmented systems	→	More stable and integrated environment
	Lower confidence and consistency	→	Increasing confidence and consistency
	Inconsistent processes	→	More standardised processes
	Multiple disconnected tools	→	Connected digital environment

KEY THEMES

Based on feedback from **41** staff across all business groups

USABILITY

- Systems can feel clunky or inconsistent
- Navigation isn't always intuitive
- Some processes take more clicks than expected

REPORTING & DATA

- Continued manual effort required
- Limited access to timely reporting and information
- Information is often duplicated across systems

TRAINING & ADOPTION

- Greater demand for structured training and guidance
- Staff often rely on self-learning
- Ongoing support would build confidence

INFORMATION MANAGEMENT

- Confusion around where information is stored
- Multiple locations for key documents
- Desire for a clearer and consistent source of truth

WHAT THIS MEANS FOR OUR ROADMAP

Our roadmap is informed by your feedback and aligned to strategic priorities.

THE ROADMAP HAS BEEN SHAPED BY BOTH:

SURVEY FEEDBACK

- ✓ Themes identified through staff feedback
- ✓ Improvement opportunities submitted by teams

STRATEGIC PRIORITIES

- ✓ Legislative and compliance requirements
- ✓ Corporate priorities
- ✓ Operational needs
- ✓ Technology lifecycle and risk

OUR APPROACH

Rather than focusing on either optimisation or transformation, the roadmap intentionally balances both.

Continuous improvement to optimise the systems delivered through Novus.

Strategic initiatives that continue to modernise business processes and technology.

Operational priorities that respond to emerging business needs.

The following roadmap brings these priorities together into a single, **balanced program of work**

The Roadmap

WHAT IS A ROADMAP?

A roadmap provides a **forward view** of the initiatives we plan to deliver and the direction we're heading.

It helps us to:

-  **Prioritise work** based on business need, value and effort.
-  **Balance** strategic initiatives with continuous improvement.
-  **Sequence work** over time, recognising dependencies and available capacity.
-  **Provide visibility** of upcoming priorities across the organisation.
-  **Adapt** as business priorities and opportunities evolve.

A roadmap is not a fixed plan. It is reviewed and updated regularly as priorities, dependencies and organisational needs change.

HOW WE BUILT THE DRAFT ROADMAP

1 GATHER OPPORTUNITIES

Previous engagement

Existing initiatives

Staff feedback

Combined to create a single list of improvement opportunities.

2 ASSESS & PRIORITISE

Effort

Benefits

Risk

Cost

Every initiative was consistently assessed to determine the most appropriate timing and priority.

3 DRAFT ROADMAP

**Draft roadmap
ready for validation**

This roadmap reflects our current understanding and will continue to evolve as priorities change.

T&P ROADMAP

12-month delivery plan — FY26/27

JUL AUG SEP OCT NOV DEC JAN FEB MAR APR MAY

NEW SYSTEMS & PLATFORM DELIVERY

Finance Year End

Work Management Roll-out

Fix Information Management

Enable Customer Experience Journey

Integrated 'One' Platform to manage all (non-operations) work

CONTINUOUS IMPROVEMENT

Improved Payroll experience (inc. timesheets)

Improving the systems we have (e.g. BC, AV, HR21, ELMO, ServiceDesk, GIS, CM, SharePoint, CM etc)

Streamline how we bill our customers and get paid

Improve how we buy and pay for things

Define what we want to report on and how

CURRENT MAJOR FOCUS

Work Management Roll-out is our largest transformation initiative and will remain the team's primary delivery focus over the next 9–12 months.

IMPORTANT TO NOTE

- Delivery windows are indicative and will continue to be refined as planning progresses and dependencies become clearer.
- More urgent business priorities may emerge, requiring us to adjust the sequencing or timing of initiatives.
- Where significant changes are made to the roadmap, these will be communicated to the business.

Bar length indicates the planned delivery window across the financial year.

ONE PLATFORM TO DELIVER & TRACK WHAT WE DO

We know our current systems and processes are siloed. We're exploring a solution that brings everything together.

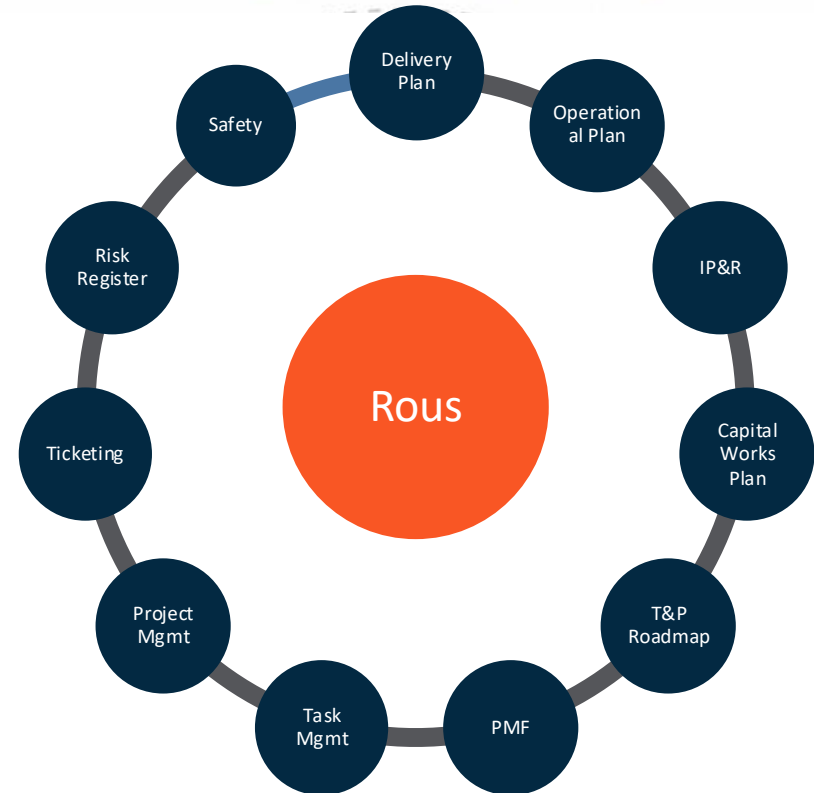

ROUS TODAY

We operate in silos across multiple platforms

ROUS TOMORROW (OUR AIM)

We work together in an integrated ecosystem

We need to investigate solutions that could bring our systems together in a more connected and seamless way.

BACKLOG (TO BE PRIORITISED / DEPENDENT)

These initiatives have been identified and remain under consideration.

Some items are dependent on work currently underway or other roadmap initiatives being completed first.

IMPORTANT TO NOTE

Some backlog initiatives are dependent on work already underway and cannot be progressed until those foundational initiatives have been completed.

Reporting Strategy & Analytics

- DT-69 – Fabric – data sourcing
- DT-69 – Source System reporting
- DT-143 – Jet Reports for BC
- DT-111 – Self-serve reporting etc
- DT-33 – Creation of new reports

Business Central Projects

- DT-65 – Dimension review
- DT-61 – Projects module
- DT-34 – Timesheets

Business Central Budgeting

- DT-62 – Use of budgeting module

Business Central Enhancements

- DT-64 – Bank recon
- DT-39 – AI for Finance Insights
- DT-12 – Copilot and agents for BC
- DT-7 – eInvoicing (AP)
- DT-9 – eInvoicing (AR)
- DT-11 – Payments Gateway

OnePlatform Expansion

- DT-35 – ModernGov review / replacement
- DT-27 – PMF platform
- DT-26 – IP&R Reporting platform
- DT-88 – Project management tool standardisation
- DT-86 – Task and Work Management for Indoor
- DT-28 – Risk register platform and integration

Procure, Store & Pay

- DT-94 – Contract management system (replace POPs and contract tracking)
- DT-60 – Supplier management system
- DT-101 – RFX Process
- DT-56 – Continia optimisation
- DT-15/DT-18/DT-96/DT-100 – Inventory / stores systems (inc. Chemicals management)
- DT-181 – Verizon Fleematics review

System Integrations

- DT-110 – Temetra meter readings to BC
- DT-17 – iChris to BC
- DT-46 – Notice of Sale API
- DT-67 – AV/CRM Integration (review and activate)
- DT-110 – BC/CRM integration
- Weel to BC integration

Weeds Systems

- DT – 123 CRM for Weed Bio
- Automation of job capture (through CRM or GBMKconnect)

CRM & Water Billing

- DT-87 Improve Water Billing template

HR & Payroll

- DT-76 – HR21 – App
- DT-77 – Payroll Optimisation
- DT-140 – Elmo/HR21 Functionality Review
- DT-21 – ELMO, iChris, Entra alignment process

AI & Automation Strategy

- AI Strategy initiatives and exploration across business areas

WORKING WITH YOU

A collaborative approach to developing, validating and communicating our roadmap.

HAVE AN IMPROVEMENT IDEA?

We recognise that new opportunities will continue to emerge as teams use our systems and processes.

The roadmap isn't a static document—it will continue to evolve as business needs change and new opportunities are identified.

We want to hear your ideas.

Whether you've identified:

- An improvement we may not already be aware of.
- Additional context that could strengthen an existing initiative.
- A new opportunity to improve the way we work.

➔ Please submit your idea through the **Helpdesk**.

While we may not be able to progress every idea immediately, every submission will be reviewed and considered as either:

A strategic initiative

A continuous improvement opportunity

Referred to the appropriate business area if it sits outside the scope of the Digital Transformation roadmap.

Every idea helps shape future roadmap priorities.
